The instructions were quite clear on this. The reason was that when you buy Lightroom mobile you also get a copy of Lightroom 6 for desktop on your computer, and when you install Lightroom mobile, the app will download the desktop version of Lightroom 6 to the desktop. Lightroom mobile will be required so you can upload photos and edit them. Lightroom mobile is well worth the money. I think many people are wondering why it is not on the iOS App Store. I would assume it is because users of Android have more control over their phones and can manage all their devices much better. But the users of iOS should not be forced to use the Apps Store. Blue Master may be the cheapest option in the field of camera modding. However, the company behind it does not sell any hardware. The modded cameras will be based on existing Nikon DSLRs, and they are not really DIY hardware. The company actually released a $1000 version of the project, the BM-1000 and BM-1000W, which is even more expensive than the original project. So this is not a cheap hobby at all. If you want to have a business and/or a better image quality, I would recommend you
