Support: nullDC cannot be attached to Dreamcast and runs at low speed. You need to use secured connection and specify username and password. nullDC has been tested on Windows XP SP3, Vista, 7, 8, 10, 2012. You can find nullDC here. Since both iGadget and GamesOnConsole are dead, I would like to make something to run Gens of Genesis Games. Here is a very old compilation of all available libretro archive. That means, that only SB 16 and 17 are supported by this emulator. All other Genesis games are going to run on modified version of this emulator. That is not a problem to create, because I have all originals databases ready. Using names provided, here are the released files: Please, use only files names provided. Releases are not required to try on the game. If needed, please ask me how to compile on C# and publish with GitHub pages. Thanks. For all nerds:
Genesis . Genesis . NES . NES . Update: Here is the latest version of nullDC:
