Recent versions of Photoshop have shifted toward a point-and-click approach, making it much easier to use the program's features. Developing skills with Photoshop Photoshop is a very powerful tool and that means that it has a steep learning curve. Getting started with Photoshop can be intimidating — and that's before you even

---

think about learning how to use all the features to do what you need to do. Luckily, many articles and free tutorials are available online to help you learn and master Photoshop. In this section, we suggest some of the basic tools and techniques you can use to get a strong grasp of the basics of Photoshop. Becoming familiar with the tool palette

contains most of the tools that you can use to manipulate an image. Most of the tools are grouped together with similar functions. For example, the eraser tool is grouped with the lasso tool, and the spot healing tool is grouped with the paint bucket tool. Understanding the primary tools To work with a variety of tools, you need a primary tool that enables you to select an area of an image or

---

specific areas of an image. The most common tools used to select an area of an image are the brush, color picker, and paint bucket. Most Photoshop tools can be found in the tool palette, in addition to the primary tool box icon that appears in the lower-right corner of the Photoshop workspace. Figure 9-4 shows the tool palette that includes the brush, color picker, and paint

bucket tools. The top row contains the brushes, the middle row contains the color picker and paint bucket tools, and the bottom row contains the tools palette window. \*\*Figure 9-4:\*\* The tool palette contains many of Photoshop's most common tools. The following sections describe the tool tips and tools in the tool palette.

**Brushes** Brushes make it easy to apply various effects to an

---

image. You can use a variety of brush settings for various effects, including shadow, highlight, and color. The paintbrush tool, as shown in Figure 9-5, is your most common brush type, and it's also the only brush you can use for every purpose. You can paint directly on the image or apply paint to a layer or layer mask, enabling you to edit your work in various ways. You can

I know many of you are sick of hearing about the Seattle Seahawks' 3-1 start, especially after seeing much of the same-old-same-old all season long. Well, their lackluster performance in a win over the Oakland Raiders on Sunday doesn't mean we shouldn't still continue to honor the Seahawks for everything they have done

---

this year. One of the things that I think is most impressive about the Seahawks are the small things they do that really go unnoticed. There are so many small things that go into a game that really make the difference for the Seahawks. 1) Offense This is one of the most underrated units for the Seahawks. They scored over 30 points in every game this year except for Sunday. They also

---

only allowed one touchdown in the Raiders game. One of my favorite small things from Seattle is how well Russell Wilson manages games by constantly looking downfield for wide receivers. I believe that this is the biggest reason why the Seahawks offensive unit has been so productive. They have been successful all year because their offensive unit has done a great job of not

---

turning the ball over. Even though they are starting a rookie quarterback, they are doing an excellent job of commanding the offense. They also throw the ball quickly with a quick release. That allows the receivers to go get their yardage after they catch the ball. This team has five Pro Bowl receivers and two Pro Bowl running backs. The running backs, Marshawn Lynch and

---

Thomas Rawls, are the two running backs that are the reason the Seahawks can run the ball so well. I would describe Lynch as an old man that still runs for yardage in the open field. He is not the greatest runner, but he is the best pass blocker and receiver out of the backfield. Lynch also has a great sense for the open field. Rawls is a guy who can be dangerous as a pass receiver out

---

of the backfield. He has so many strengths and weaknesses. He is a smart and quick running back that has the same speed as Lynch. He also has a great sense of catching the ball out of the backfield. He can also be dangerous as a receiver out of the backfield because of his quick cuts to the outside and can be a physical runner in the open field. But, one thing that Rawls doesn't do is make the

---

most of his opportunities. If he gets in the open field, he runs straight up the middle. That was shown against the Raiders. In
